Memo to File:

RE: Lucky Strike/Tony M. Mine
ACT/017/001
Plateau Resources Ltd.

This mine site was visited on June 20, 1979, by Ron Daniels and Mary Ann Wright of the Division. The purpose of the visit was to reinspect surface facilities before tentative approval was recommended to the Board. The visit was made in conjunction with visits to the proposed mill and Frank M. Mine sites.

It was noted that the ore storage bins were almost completed and that all facilities were in accordance with a recently submitted map.

Revegetation plans were discussed with Ms. Pam Newman and Mr. Fred Gurdeman of Plateau. Plans for reclaiming the camp area, after facilities are moved in the spring of 1980, and plans for test plots on waste dump material were discussed. Plateau Resources has committed to submitting more definite plans in the near future and to implementing some of them in the next planting season.

MARY ANN WRIGHT
